Part I. THE BUREAU OF AGRICULTURAL ECONOMICS

WORK OF THE BUREAU

The Bureau of Agricultural Economics is the economic and social research agency of the Department of Agriculture. It is the Department's fact-finder in agricultural statistics, in prices, demand and supply, costs and income, marketing, transportation, manpower, credit, taxation, land and water utilization, rural welfare, and other aspects of agricultural production and distribution. Through its analyses and interpretations of the facts collected, it provides a basis for the formulation and guidance of national agricultural policies.

The functions of the Divisions of Work, as described in the organization chart on page 2, indicate the varied activities of the Bureau. In the Nation's present all-out war program the Bureau is expected to furnish the basic data and analyses that the Nation must have in order to determine what wartime food and fiber requirements must be met and how these needs can best be satisfied. In war and peace alike, the underlying function of the Bureau is to expedite the production and distribution of ample supplies of agricultural commodities at prices reasonable for the consumer yet high enough to allow a fair return to people living on farms.

In these activities the Bureau studies continuously the shifting economic and social conditions that always are bearing upon agriculture. It analyzes a wide variety of problems affecting individual farm enterprises and related agricultural businesses. It points out methods by which farmers may adjust their enterprises to changed conditions, and provides information to assist farmers in determining what and how much to produce, how to finance and manage their farms, and how and when to market their products.

Part II. PERIODICALS AND SCHEDULED REPORTS

SITUATION REPORTS

The Agricultural Situation is a monthly printed periodical divided into two major sections. One section contains brief reviews of current developments in various farm commodities and in agricultural production and distribution problems; the other section, short articles analyzing the economic aspects of agriculture, such as marketing, food supplies, price conditions, scientific developments, farm land values, farm-mortgage debt, etc.

This periodical is issued in two editions: the full edition, which contains the commodity reviews and signed articles as outlined above; and a separate, containing only the commodity reviews, that is prepared for the quarter-million volunteer crop and price reporters who supply the Department with a continuous flow of basic data on agriculture.

The full edition is designed primarily for county agents and other local agricultural workers to aid them in keeping informed on the economic aspects of agriculture.

Free distribution of this edition is limited. See application blank following page 52.

The Demand and Price Situation presents monthly a review of the factors affecting the demand for farm products and of general trends in the prices of farm products, wholesale prices of other products, and farm income. Summaries of the price situation and the outlook for the major farm products are also included. This publication provides more detailed and technical analyses than does "The Agricultural Situation."

The Farm Income Situation, issued monthly, contains estimates of cash farm income from marketings and Government payments in the preceding month, with separate estimates of income from the principal groups of commodities. Estimates, by States, of income from sales of crops, livestock, and livestock products are also given. Government payments by States are reported in August and February. Annual estimates of cash and gross income by States for major farm commodities, estimates of volume of agricultural production for sale and home consumption, and estimates of selected farm expenses are presented from time to time.

The Marketing and Transportation Situation, issued monthly, is divided into three parts: (1) a summary, with statistical tables, of price spreads between the farmer and the consumer, and related information of marketing charges, consumer expenditures for food products, and the share of the consumer's dollar received by farmers; (2) occasional summaries of latest developments in the field of marketing and transportation of farm products, having general significance to marketing research and extension workers, agricultural businessmen, farm leaders, and consumer groups; (3) a special article dealing with some marketing or transportation problem of current significance or summarizing the results of Bureau research that are especially timely or that may be unsuited to separate publication. Each fall the outlook for marketing and transportation

for the succeeding year is analyzed, and soon after the end of each calendar year the data for the past year as a whole and comparisons with the preceding years are given.

The National Food Situation, issued monthly, contains statistical tables showing the index numbers of retail food prices and nonagricultural income payments, the distribution of food supplies, and the per capita consumption of major foods by income levels. Supply, production, marketing, and consumption of major foods are covered in summaries and special articles. A survey for the year as a whole and the outlook for the succeeding year appear in one issue each fall.

The following commodity situation reports give a rather complete picture of the supply, demand, price, and outlook for each of the more important farm products for which adequate information is available. They contain information on the outlook for agricultural commodities to aid in planning production and marketing. Tables and charts present current figures on acreage, yield, production, market movement, stocks, consumption, and prices, and also comparisons with other significant periods. From time to time the results of special studies relating to the prices of the respective commodities are included.

The Cotton Situation, monthly

The Dairy Situation, monthly

The Fats and Oils Situation, monthly

The Feed Situation, monthly

The Fruit Situation, 4 times a year

The Livestock and Wool Situation, monthly

The Poultry and Egg Situation, monthly

The Rice Situation, issued as outlook information becomes available

The Tobacco Situation, about 4 times a year

The Vegetable Situation, 4 times a year

The Wheat Situation, bimonthly except July and August

The World Sugar Situation, annually

OUTLOOK INFORMATION

In addition to current outlook materials, the situation reports listed above carry an annual statement--published at the time of year when the farmer can best use such data in preparing his production and marketing plans for the coming year. An entire issue of The Agricultural Situation, usually the November number, is devoted to this subject. Outlook Conference addresses are listed on page

Agricultural Outlook Charts, issued each fall, is a book that contains graphic materials most likely to be of use to Extension workers in presenting the basic facts for the major crop and livestock industries. Subjects covered include the principal crops, livestock, oilseeds, farm family living, demand, credit, and prices.

Photographic prints of separate charts and maps are for sale at 30 cents each for 8" x 10" prints. Ozalid prints of outlook charts, 30" x 40" in size, can be supplied for 40 cents each. 1/

CHECK LIST

The Check List of Publications, a monthly supplement to Agricultural Economic Reports and Publications, lists Bureau publications, including charts and maps, issued during the previous month. This list will be found helpful to those who wish to keep up to date on all materials issued on a specific subject.

STATISTICAL SUMMARY

The Statistical Summary, prepared for ready-reference desk use, is a two-page monthly round-up of current information on farm income, farm employment, marketing margins, production, stocks, and indications for principal crops and livestock and livestock products. It also contains tables showing current index numbers for agriculture and parity prices for farm products compared with actual prices received.

LAND POLICY REVIEW

The Land Policy Review is a quarterly printed publication devoted to economic and social phases of agriculture, especially war and post-war agricultural and land matters. It is a journal of opinion, presenting nontechnical discussion, reports, and criticisms by qualified persons within and outside of the Department. It is committed to no particular program or policy; rather it attempts to present background material for the making of policies.

Free distribution is limited. See application blanks following page 52.

1/ Single bromide enlargements, 30" x 40" in size, of charts and maps other than outlook charts will be made for \$1.00 each.

AGRICULTURAL FINANCE REVIEW

The Agricultural Finance Review, a processed report issued each November, consists of a review of current developments and research in the field of farm credit, farm insurance, and farm taxation. A statistical appendix gives detailed data by States and by geographic divisions.

Featured in this review, and also issued as separate reports, are data on farm real estate taxes, income taxes and the farmer, and farm-mortgage debt. (See page for these and other reports on agricultural finance.)

Also featured in the Review, but no longer issued as separate reports, are the following:

Amount of outstanding farm-mortgage loans, by States, held by leading agencies at the end of each year. Data are included for the Federal land banks and the Land Bank Commissioner, life insurance companies, joint stock land banks, commercial banks, and three State credit agencies.

Agricultural loans held by all insured commercial banks, by States, as of December 31 and June 30. Loans are classified into two groups: (1) personal and collateral loans, showing for more recent dates a break-down of loans secured by agricultural commodities covered by purchase agreements of the Commodity Credit Corporation, and (2) loans secured by farm real estate. (Earlier data included in Tech. Bul. 321, "Agricultural Loans of Commercial Banks.")

Interest rates charged on farm mortgages by credit agencies under the supervision of the Department of Agriculture and by other lenders. Data cover the period from 1910 to date. (Data for earlier years included in Misc. Pub. 478, "Farm Mortgage Credit Facilities in the United States.")

Indexes of net demand deposits of member banks of the Federal Reserve System, located in places of less than 15,000 population, compiled for four groups of States: (1) the 20 leading agricultural States, excluding California, corrected for seasonal variations; (2) Alabama, Arkansas, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, and South Carolina; (3) Ohio, Indiana, Illinois, Iowa, Minnesota, Missouri, and Nebraska; (4) Montana, Colorado, Arizona, Idaho, Nevada, New Mexico, Utah, and Wyoming. Monthly indexes have 1924-29 monthly average as the base. (Monthly data available in typewritten form upon request.)

Farm-bankruptcy reports containing an analysis by States of cases handled under Section 75 of the National Bankruptcy Act.

Insurance companies owned and controlled by farmers, and operating on a mutual plan. Data cover farmers' mutual insurance companies that deal in fire, windstorm, and other types of needed insurance.

CROPS AND MARKETS

Crops and Markets, a printed quarterly publication, carries production and market statistics and analyses of an economic and statistical nature. Production statistics include reports of the Crop and Livestock Reporting Service, prices received by farmers, and intentions to plant and to breed. Market statistics fall under these general classes: Livestock, meats, and wool; dairy and poultry products; grain; feed; and cotton.

Free distribution is limited. See application blanks following page 52.

The following separates from 1944 issues of Crops and Markets are available free upon request: "Cost of Producing Field Crops, 1942" and "Index Numbers of Prices Received and Paid by Farmers and Average Prices Received for Crops, Livestock and Livestock Products."

THE FARM REAL ESTATE SITUATION

The Farm Real Estate Situation, issued annually as one of the regular Circular series of the Department, reviews briefly the general situation and discusses values in the separate geographical divisions and States, and such items as causes of changes in values, changes in farm ownership including voluntary and forced sales, farm-mortgage credit, and other factors bearing upon the farm real estate situation.

Current Developments in the Farm Real Estate Market, a processed report prepared every four months (March, July, and November), summarizes significant facts on trends in land values, volume of sales, types of buyers and sellers, financing of transfers, and influences operating in the farm real estate market as revealed by current surveys.

FARM POPULATION ESTIMATES

Farm Population Estimates, released about June 15 each year, contains annual estimates of the number of persons living on farms, the movement from farms to towns and cities and from towns and cities to farms, and the number of births and deaths in farm population. These estimates are based on returns from farmers, supplemented by vital statistics and census data. Besides the total figures for the United States there are tables by geographic divisions. A summary is printed in "The Agricultural Situation."

Other population reports are listed on pages 50 and 51.

CROP AND LIVESTOCK PRODUCTION REPORTS

The Crop and Livestock Reporting Service^{1/} includes an extensive program of periodic reports on crop production and related information. These reports are issued by the Washington office for the country as a whole, and are reissued through the 41 field offices (see page 6) with emphasis on local conditions.

The reports are given general distribution by press and radio. Immediately after release, mimeographed copies are distributed to persons who request them. Much of the information shown in these reports is summarized quarterly in the statistical periodical, "Crops and Markets."

A detailed schedule of release dates^{2/} for the various crops and livestock reports issued by the Crop Reporting Board during 1944 follows.

Reports on Cotton (Released at 11:00 a.m., E.W.T.)

- April 28: Acreage, yield per acre, production of cotton lint and seed, value of production of lint, disposition and value of cottonseed, cottonseed meal used as fertilizer on cotton farms, monthly marketings by farmers, reductions from full yield per acre due to boll weevil and other causes (1943 crop).
- July 8: Acreage of cotton in cultivation on July 1.
- August 8: Condition as of August 1, indicated yield per acre, indicated production, commercial fertilizer used on cotton.
- September 8: Condition as of September 1, indicated yield per acre, indicated production, percentage of acreage abandoned since July 1, acreage for harvest.
- October 9: Condition as of October 1, indicated yield per acre, indicated production.
- November 8: Yield per acre as of November 1, probable production.
- December 8: Yield per acre as of December 1, probable production, gross weight per running bale, acreage for harvest, acreage in cultivation July 1.

^{1/} For a complete description of this service, see reprint from Misc. Pub. 171, available upon request from the Bureau of Agricultural Economics.

^{2/} Wherever dates given conflict with Saturdays, Sundays, or holidays, the scheduled report is released on the next business day. A new Schedule is issued in January of each year and is available free upon request.

General Reports on Production
(Released at 3:00 p.m., E.W.T.)

- January 10: Stocks of corn for grain, wheat, oats, and soybeans on farms as of January 1; stocks of barley and rye on farms as of December 1, 1943; acreage of flaxseed seeded in Arizona, California, and Texas; milk production; poultry and egg production; indicated production of citrus fruits (1943-44 crop).
- February 10: Milk production; grain fed per milk cow; poultry and egg production; indicated production of citrus fruits (1943-44 crop).
- March 10: Milk production; poultry and egg production; indicated production of citrus fruits (1943-44 crop).
- March 20: Prospective Planting for 1944 as indicated by reported intentions for corn, durum wheat, other spring wheat, oats, barley, flaxseed, rice, all sorghums, potatoes, sweetpotatoes, tobacco, dry edible beans, dry field peas, soybeans, cowpeas, peanuts, and sugar beets; acreage of tame hay for harvest.
- April 10: Acreage seeded, indicated yield per seeded acre as of April 1 and indicated production of winter wheat; condition of rye and pasture; for certain States, condition of peaches and potatoes; stocks of corn for grain, wheat, oats, and soybeans on farms as of April 1; milk production; poultry and eggs production; indicated production of citrus fruits (1943-44 crop).

On April 11 a table showing reported condition by States as of April 1, of winter wheat, will be supplied to those who make special request. A similar table will be available on the day following the reports from May 10 to October 11, inclusive, showing reported condition of principal crops.

- May 10: Acreage remaining for harvest as of May 1, yield per acre and indicated production of winter wheat and rye; percentage of abandonment of winter wheat seedings; condition of tame hay, pasture, and miscellaneous fruits and nuts; stocks of hay on farms; for certain States, condition of oats, potatoes, peaches, pears, and grapes; indicated production of citrus fruits (1943-44); indicated production of peaches in 10 early southern States and of Florida limes (1944 crop); production of maple products (1944 crop); milk production; poultry and egg production. Also for 1943 crops, acreage, yield per acre, production, and value of production of tobacco by types and classes; acreage and production of sugar beets and sugarcane, and production of beet and cane sugar, sugar beet pulp, and products of cane ground for sugar.

- June 9: Indicated yield per acre as of June 1 of winter wheat and rye; indicated production of winter wheat, spring wheat, oats, barley, rye, peaches, pears, cherries, apricots, California plums and prunes, Florida limes (1944 crop), and citrus fruits (1943-44); stocks of barley and rye on farms; condition of hay, pasture, apples (commercial), citrus fruits, and miscellaneous fruits and nuts; for certain States, condition of potatoes and grapes; milk production; poultry and egg production.
- July 10: Stocks of corn for grain, wheat, oats, and soybeans on farms as of July 1; planted acreage of corn, spring wheat, oats, barley, flaxseed, rice, potatoes, sweetpotatoes, dry edible beans, dry field peas, and all sorghums (excluding sirup), and sugar beets; acreage for harvest, indicated yield per acre as of July 1, and indicated production of corn, winter wheat, spring wheat, oats, barley, rye, flaxseed, rice, soybeans, hay, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, dry edible beans, dry field peas, and hops; acreage grown alone for all purposes of soybeans, cowpeas, velvet beans, and peanuts; acreage for harvest of sugarcane for sirup, sorghum for sirup, and all sorghums (excluding sirup); condition of peanuts; indicated production of peaches, pears, grapes, cherries, apricots, plums, prunes, California almonds and walnuts, Florida limes (1944 crop), citrus fruits, and miscellaneous fruits and nuts; milk production; poultry and egg production.
- August 10: Yield per acre as of August 1 and indicated production of corn, winter wheat, spring wheat, oats, barley, rye, buckwheat, flaxseed, rice, all sorghums for grain, hay, dry edible beans, dry field peas, soybeans, peanuts, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, broomcorn, and hops; acreage of buckwheat, all sorghums for grain, peanuts picked and threshed, and broomcorn; stocks of rice on farms as of Aug. 1; indicated production of apples (commercial), peaches, pears, grapes, cherries, apricots, plums, prunes, almonds, walnuts, filberts, and pecans; condition of pasture, soybeans, cowpeas, citrus fruits, and miscellaneous fruits and nuts; milk production; poultry and egg production.
- September 11: Indicated yield per acre as of September 1 and indicated production of corn, spring wheat, oats, barley, buckwheat, flaxseed, rice, all sorghums for grain, tame hay, wild hay, dry edible beans, dry field peas, soybeans, peanuts, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, broomcorn, and hops; acreage of soybeans for beans (principal States); indicated production of apples (commercial), peaches, pears, grapes, plums, prunes, apricots, cranberries, almonds, walnuts, filberts, and pecans; condition of pasture, cowpeas, citrus fruits, and miscellaneous fruits and nuts; milk production; poultry and egg production.

- October 10: Stocks of corn for grain, wheat, oats, and soybeans on farms as of October 1; indicated yield per acre and indicated production of corn, all wheat, spring wheat, oats, barley, buckwheat, flaxseed, rice, all sorghums for grain; tame hay, dry edible beans, soybeans, peanuts, potatoes, sweetpotatoes, tobacco, sugar beets, sugar cane for sugar and seed, broomcorn, and hops; indicated production of apples (commercial), peaches, pears, grapes, plums, prunes, cranberries, citrus fruits (1944-45 crop), almonds, walnuts, filberts, and pecans; condition of pasture and miscellaneous fruits and nuts; indicated yield per acre of soybeans for beans (all States) and cowpeas; milk production; poultry and egg production.
- November 10: Indicated yield per acre as of November 1 and indicated production of corn, buckwheat, rice, all sorghums for grain, dry edible beans, soybeans, peanuts, potatoes, sweetpotatoes, tobacco, sugar beets, sugarcane for sugar and seed, sugarcane sirup, and sorgo sirup; production of apples (commercial), pears, grapes, cranberries, citrus fruits, almonds, walnuts, filberts, and pecans; condition of pasture and miscellaneous fruits and nuts; milk production; poultry and egg production.
- December 11: Indicated production of citrus fruits; milk production; poultry and egg production.
- December 18: Annual summary of acreage, yield per acre, production of all crops.
- December 20: Seeded acreage, condition as of December 1, and indicated production of winter wheat and acreage and condition of rye for harvest in 1945.

Other Reports Concerning Crop Production

Wheat Stocks in Interior Mills, Elevators, and Warehouses: 3:00 p.m., January 25, April 25, July 25, and October 25.

Corn, Oats, Barley, and Rye Stocks in all positions: 3:00 p.m., January 28, April 28, July 28, and October 28.

Soybean Stocks in all positions: 3:00 p.m., February 10, May 10, August 10, November 10.

Peanut Stocks and Processing: 3:00 p.m., 18th of each month.

Potato Stocks (Jan. 1) and Disposition: 3:00 p.m., January 20 (tentatively).

Onion Stocks (Jan. 1): 3:00 p.m., January 18.

Cabbage Stocks (Jan. 1): 3:00 p.m., January 18.

Commercial Truck Crops for Fresh Market and Processing:

Fresh Market Crops: Acreage, production, and condition of crops in areas of current importance. January 8 and 22; February 9 and 23; March 9 and 23; April 8; May 9 and 23; June 9 and 23; July 8 and 22; August 9 and 23; September 9 and 23; October 9; November 9; December 9 and 18.

Processing Crops: Acreage, production, and condition of crops in areas of current interest. January 8; March 9; April 8 and 21; May 5 and 19; June 9 and 23; July 8 and 22; August 9; September 9; October 9; November 9; December 8 and 18.

Truck Crop News: 6th and 20th of each month.

Fruit and Nut Crop Prospects: April 14, May 15, June 15.

Cranberries: Indicated production, 1:00 p.m., August 22.

Seed Production Forecasts:

June 20 Crimson Clover	Aug. 18 Alsike Clover	Oct. 13 Alfalfa
June 23 White Clover (La.)	Aug. 25 Winter Cover Crops	Oct. 17 Sudan Grass
June 30 Kentucky Bluegrass	(Vetches, etc.)	Oct. 20 Sunflower
July 14 Orchard Grass	Aug. 25 Mustard (prel.)	Nov. 10 Lespedeza
July 14 Meadow Fescue	Sept. 15 Sweetclover	Nov. 17 Mustard
July 14 Redtop	Sept. 22 Bromegrass and	(final)
Aug. 11 Timothy	Wheatgrasses	Dec. 30 Certified
Aug. 18 White Clover	Oct. 6 Red Clover	Seed Potatoes
(Wis. & Idaho)		

In addition, reports will be issued giving the relative production of carpet grass, millets, and sorghos on September 1, October 27, and November 3, respectively. Reports on prices, movement, quality, stocks, shipments, disposition, and sales of important field seeds will be issued at appropriate intervals.

Farm Disposition and Sales of Crops (except cotton, tobacco, and sugar crops): May 2. Similar information for cotton and cottonseed will appear in the April 28 cotton report; for tobacco and sugar crops in the May 10 general crop report.

Percentage of Corn Acreage Planted with Hybrid Seed: On or about July 11.

Monthly Sales of Principal Field Crops: On or about November 15.

Reports on Livestock

(Released at Washington, D. C., at 12:00 o'clock noon E.W.T.)

- January 13: Cattle on feed for market on January 1.
- January 14: Sheep and lambs on feed for market on January 1.
- February 18: Number and Value of Livestock, including poultry, on farms on January 1, 1944.
- March 3: Wool production and Income, 1943.
- March 6: Mohair Production and Income, 1943.
- March 10: Early Lamb Crop as of March 1, (10 States).
- April 13: Development of Early Lamb Crop, as of April 1.
- April 14: Cattle on Feed for Market, Corn Belt States, as of April 1.
- April 29: Farm Production and Income from Meat Animals, 1943.
- May 12: Development of Early Lamb Crop, as of May 1.
- June 23: Spring Pig Crop, and fall farrowings indicated by breeding intentions as of June 1.
- August 4: U. S. Lamb Crop, 1944, Number and Percentage of Breeding Ewes.
- August 14: Cattle on Feed for Market, Corn Belt States, as of August 1.
- August 15: Production of Shorn Wool, 1944.
- October 12: Cattle Feeding Situation as of October 1.
- October 13: Lamb Feeding Situation as of October 1.
- November 14: Cattle Feeding Situation as of November 1.
- November 15: Lamb Feeding Situation as of November 1.
- December 13: Cattle Feeding Situation as of December 1.
- December 14: Lamb Feeding Situation as of December 1.
- December 22: Fall Pig Crop of 1944, and Spring Farrowings in 1945 indicated by Breeding Intentions.

(Released at Denver, Colorado)

- April 10: Condition of Flint Hills and Osage Pastures as of April 1.
- June 9: Shipments of Cattle into Flint Hills and Osage Pastures as of June 1.
- Condition of Ranges, Cattle, and Sheep issued about 10th of each month.

Reports on Poultry and Eggs

Egg Production: Number of layers on hand during month, eggs per 100 layers, total eggs produced, issued with Crop Production report about the 10th of each month. (Separate Poultry and Egg Production report discontinued for the duration of the war.)

Potential Layers, Young Chickens, and Hens on farms as of first of month issued with Crop Production reports, January 10 and October 10.

Number of Chicks and Young Chickens of Current Year's Hatchings on hand as of April 1, May 1, and June 1, issued with Crop Production report, June 9.

Chickens Raised on Farms, preliminary estimates, 1944, issued with Crop Production report, July 26.

Hatchery Production: Salable chicks hatched and eggs set during preceding month, chicks booked as of 1st of month: 15th of each month.

Liquid and Dried Egg Production: Production, by classes, and utilization during preceding month: 21st of each month.

Turkey Production indicated by reported intentions as of January 1: February 14.

Turkey Production: Numbers raised indicated by number on hand as of August 1: August 25.

Farm Production and Income from Chickens and Eggs, 1943: March 24.

Farm Production and Income from Turkeys, 1943: March 16.

Reports on Milk and Dairy Products

Dairy Production: Milk production per cow by States, 1st of month, and U. S. milk production on farms for preceding month issued with Crop Production report about the 10th of each month. (Separate Dairy Production report discontinued for the duration of the war.)

Amount of Grain Fed per Milk Cow, as of first of month:

Averages for crop reporters' herds issued with Crop Production reports, February 10 and December 11.

Averages for dairy reporters' herds issued with Crop Production reports, May 10, August 10, and November 10.

Mid-Year Estimates of Changes in Milk Cow Numbers: issued with Crop Production report, August 10.

Kind of Grain Fed to Milk Cows: issued with Crop Production report, December 11.

Milk Cows on Farms, Milk Production per Cow and Total Milk Production, 1943, by States: February 16.

Farm Production and Income from Milk, 1943: April 15.

Dairy Marketing:

Weekly Creamery Butter Production: Tuesday of each week. (Released at Chicago, Ill., 1103 New Post Office Bldg.)

Weekly American Cheese Production: Wednesday of each week. (Released at Chicago, Ill., 1103 New Post Office Bldg.)

Weekly Wisconsin Warehouse Cheese Report: Thursday of each week. (Released at Chicago, Ill., 1103 New Post Office Bldg.)

Fluid Milk Prices in City Markets: 12th of each month.

Monthly Creamery Butter and American Cheese Production: Detail, by Regions, 25th of each month. (Released at Chicago, Ill., 1103 New Post Office Bldg.)

Evaporated, Condensed, and Dried Milk Report: 25th of each month.

Dried Casein Report: 28th of each month.

Evaporated and Condensed Milk, Wholesale Grocers' Stocks: January 22, April 22, July 22, October 23.

Production of Manufactured Dairy Products in 1943: Preliminary Report July 1, 1944; Final Report on or about December 1.

Reports on Honey and Beeswax

Honey and Beeswax: Production, disposition, and value of honey and beeswax in 1943; January 15.

Winter losses and spring increases of colonies of bees, number of colonies on hand July 1, 1944, production of honey to July 1 in early States, stocks of honey and of beeswax on hand for sale and condition of colonies and of nectar plants on July 1; July 20.

Preliminary estimate of 1944 honey production, stocks of honey and beeswax on hand for sale, and condition of late honey plants; September 11.

Production of comb, extracted, and chunk honey and of beeswax in 1944, stocks of honey and beeswax on hand for sale, season's average prices received for honey and beeswax, condition of colonies and average pounds of winter stores in hives; December 5.

Package shipments of bees and of queens monthly in 1944 and expected shipments in 1945 from six leading package bee States; December 15.

Agricultural Prices

Agricultural Prices is a monthly report presenting prices received by farmers for principal crops and livestock products, index numbers of prices received by farmers, indexes of prices paid by farmers for articles bought, and parity prices. This report gives the latest information on agricultural price ceilings and price supports. Released on or about the 30th of each month.

Farm Labor

Farm Labor is a monthly report summarizing the farm labor situation, and presenting statistics on farm employment and farm wage rates. Farm employment data covers family labor and hired labor on farms, including foreign workers employed in the U. S. Material on wage rates is issued quarterly in this report. Released on or about the 14th of each month.

RADIO SERVICES

National Network Programs. Outlook information and data based on the situation reports are included from time to time during the Department of Agriculture's portion of the National Farm and Home Hour, carried each Saturday from coast to coast by approximately 75 Blue Network stations at 12:30 p.m., EWT.

The Country Journal, Saturday at 1:30 p.m., EWT, on about 60 stations affiliated with the Columbia Broadcasting System, also includes this information in its schedule from time to time.

Regional Networks. General economic information is provided to the Pacific Coast States through "Western Agriculture on the Air," presented by the Department's Radio Service from San Francisco. Twelve Blue Network stations in California, Oregon, Washington, Idaho, and Nevada carry this program Monday through Friday.

Similar information is sent to New England listeners through programs presented by the Department in cooperation with the six New England State Departments of Agriculture from Boston. These programs are carried daily over two New England networks. Also, syndicated material is sent to 22 New England stations daily.

Farm Flashes. This is a service through which additional economic information is provided by the Radio Service of the Department to listeners of approximately 600 local stations throughout the country. In most instances the Flashes are cleared through the State extension services, where they are further localized.

In addition to the above, materials from the Department are provided to the three major press associations for press and radio use.

Part III. AGRICULTURAL ECONOMIC REPORTS AND PUBLICATIONS, BY SUBJECT 1/

AGRICULTURE--WAR AND POST-WAR

Agricultural Credit in Wartime. Address by Norman J. Wall before Ohio Bankers Association, April 13, 1944. (processed)

(processed)

Country Banking in Wisconsin During the Depression. Tech. Bul. 777. 1941.

Farm Bookkeeping and the Federal Income Tax. Rev. Oct. 1943. (Revision in press)
This report presents some of the requirements for making adequate summaries
of the farm business for Federal income tax returns. Problems of record-
keeping are discussed in relation to prevailing laws and regulations govern-
ing income tax reporting. The discussion covers such subjects as choosing
the tax year, and the accounting methods, farm income, farm expenses, and
nonfarm receipts and expenditures. (Income tax data also featured in Agri-
cultural Finance Review; see page 10.)

Farm Income Taxes Under the Pay-As-You-Go System. July 1943. (processed)

Farm Mortgage Debt Reduced 952 Million Dollars, 1940-44. July 1944. (processed)
Gives estimates of total farm mortgage debt and number of farms mortgaged,
by tenure and by States, issued for census years. Annual estimates of
total mortgage debt by States cover period from 1910 to date. Estimates
for intercensal years are based on holdings of leading agencies and upon
data relating to mortgages filed and released for other agencies. (See
also Agricultural Finance Review, page 10; and for earlier data, "Farm
Mortgage Credit Facilities in the United States" below.)

Farm-Mortgage Credit Facilities in the United States. Misc. Pub. 478. 1942.

Farm-Mortgage Indebtedness in the United States. Release 1: Number of
Mortgaged Farms. July 25, 1943. (processed)

Farm-Mortgage Indebtedness in the United States. Release 2: Amount of Farm-Mortgage Debt. Mar. 25, 1944. (processed)

Farm-Mortgage Investments of Life Insurance Companies. Dec. 1943. (processed)

Farm Real Estate Taxes in 1943. July 1944. (processed)

Data on farm real estate taxes are given in three series: Amount of taxes per acre, indexes of taxes per acre, and taxes per \$100 of real estate value. Levies for earlier as well as recent periods are given. In all States where possible the data represent sample farms for which acreage and tax figures are gathered from local-government officials. In other States corresponding data are obtained from county agents, voluntary crop reporters, or farmers selected by local officials. For certain States the agricultural experiment stations have furnished field records. The reports are so weighted as to give estimates that cover all farms in all counties rather than just the farms and counties reporting; county totals are weighted in determining State and geographic division figures. (See also Agricultural Finance Review, page 10.)

The Farmers' Interest in the New Tax Law. June 1944. (processed)

Federal Seed-Loan Financing and its Relation to Agricultural Rehabilitation and Land Use. Tech. Bul. 539. 1936.

Part IV. HOW TO ORDER MATERIALS

Copies of one or more of the publications listed in the foregoing pages may be obtained from:

Division of Economic Information
Bureau of Agricultural Economics
U. S. Department of Agriculture
Washington 25, D. C.

Except where a charge is specified, there is no charge for these publications.

There is no charge for postage.

MAILING LISTS

Mailing lists are maintained for the periodicals and many of the scheduled reports issued by the Bureau. Names are added upon request to the above address.

For paid subscriptions, see application blanks on the following pages.

All changes of address or requests to be dropped from mailing lists should specify the exact publications involved. If possible such requests should be accompanied by the envelopes or wrappers in which the materials have been received.

Each year mailing lists are revised. At that time all subscribers currently listed receive a notice of the revision. It is necessary that these notices be filled in and returned to the Bureau; otherwise, the names of those who fail to indicate their continued need for the materials are dropped automatically from the list.

No mailing list is maintained for all reports issued on any certain subject, such as "farm income," "dairying," "parity," etc. See Check List, page 9.
